Cisco Secure Client VPN

- Locate the cisco secure client. This can be found in launchpad or in finder under applications.

- Open the application and enter in your closest VPN location. The available VPN address to enter in are below…Type only 1 of them.
  - o Atl.cvp.veeam.com
  - o Bbg.cvp.veeam.com
  - o Bom.cvp.veeam.com
  - o Col.cvp.veeam.com
  - o Evn.cvp.veeam.com
  - o Prg.veeam.com
  - o Syd.veeam.com
  - o Tdc.veeam.com

- Then hit connect and authenticate with your credentials and MFA.

  NOTE: The first time connecting will give you an error message. Please retry the connection and on your second attempt should connect you.

  If you run into any issues connecting, please reach out to the Veeam Service Desk @ servicedesk@veeam.com
